**3RD CALL FOR PROPOSALS: TARGETED CALL FOR PROJECTS OF LOCAL
INTERREG IPA CROSS-BORDER COOPERATION PROGRAMME**

2014-2020

1. Context

The Interreg IPA Cross-border Cooperation Programme "Greece –Albania 2014-2020" is a cross border co-operation Programme co-financed by the European Union under the Instrument for Pre-accession Assistance (IPA II).

The Instrument for Pre-accession Assistance for the period from 2014 to 2020 (IPA II) shall support the beneficiaries listed in Annex I of the Regulation (EU) No.231/2014 in adopting and implementing the political, institutional, legal, administrative, social and economic reforms required by those beneficiaries in order to comply with the Union's values and to progressively align to the Union's rules, standards, policies and practices, with a view to Union membership. Through such support, IPA II shall contribute to stability, security and prosperity in the beneficiaries listed in Annex I of the Regulation (EU) No.231/2014.

Within this framework, the Interreg IPA II Cross-border Cooperation Programme "Greece – Albania 2014-2020" consists of three Priority Axes and four Thematic Priorities, which are:

- **Priority Axis 1:** Promotion of the environment, sustainable transport & public infrastructure
- **Priority Axis 2:** Boosting the local economy
- **Priority Axis 3:** Technical Assistance

Priority Axis 1 will be implemented via two thematic priorities focusing on:

1. Thematic Priority (c): Promoting sustainable transport, information and communication networks and services and investing in cross-border water, waste and energy systems and facilities
2. Thematic Priority (b): Protecting the environment & promoting climate change adaptation & mitigation, risk prevention & management

Priority Axis 2 will be implemented via two thematic priorities focusing on:

1. Thematic Priority (d): Encouraging tourism and cultural and natural heritage
2. Thematic Priority (g): Enhancing competitiveness, the business environment and the development of small and medium-sized enterprises, trade and investment through, inter alia, promotion and support to entrepreneurship, in particular small and medium-sized enterprises, and development of local cross-border markets and internationalisation

The overall strategy of Interreg IPA Cross-border cooperation programme "Greece - Albania 2014-2020" is: "to find the balance between sustainable regional development and enhancement of cross-border cooperation among local population & regional institutions, in accordance with EU & national policies, in order to address common challenges through joint interventions"

The Programme's budget allocated for the period 2014-2020 is 54.076.734,00€. This amount consists of 45.965.222,00€ EU contribution and 8.111.512,00€ national contributions. The national counterpart rate for both Greece and Albania is 15%. For the 3rd Call for project proposals, for the project beneficiaries from Albania, the 15% of the national counterpart will be covered by the beneficiaries own contribution

The proposed targeted project in the framework of this Call will contribute to the achievement of significant goals of the Programme. Within this project, two specific output and one result indicators of the Programme are expected to be achieved. More particular, the result indicator "% of cross-border vertical axes to Egnatia motorway either constructed or with sufficient maturity to be constructed" should reach the 100% from 80,41% and the output indicator "Kilometers of CB road network studied" with target value of 30km.

Until now 2 vertical road axes were already studied or constructed which forms part of the Orient / East Mediterranean TEN-T Corridor and cross the Greece-Albania border;

- The Ioannina-Kakavia vertical axis (length:55 kms), crossing the border at Kakavia/Kakavije and linking Ioannina to Saranda and Vlore through state-road SH4, and
- The Siatista-Krystalopigi vertical axis (length:71,3 kms), crossing the border at Krystalopigi/Kapshtica, and linking Kastoria to Korce through state-road SH3.

The coastal connection between Igoumenitsa and Saranda (and Vlore thereafter) through state-road SH97 will be achieved with the development of the vertical axis Igoumenitsa – Sagiada - Mavromati. For this latter road axis there is no construction maturity today. After the completion of this road axis there will be 3 vertical axes to Egnatia motorway serving cross-border connections between Albania and Greece.

Finally, the output indicator "Number of square meters of border crossing buildings studied or constructed" with target value of 200m². This indicator will be achieved by interventions in the cross border station Qafe-Bote in Albania.
